

### **Explanatory notes on the Scope of Accreditation**

The Scope of Accreditation of a laboratory is the list of tests for which the laboratory has been assessed and accredited by HOKLAS. A laboratory may seek HOKLAS accreditation for all or part of its activities. The Scope of Accreditation of each laboratory is published in the “HOKLAS Directory of Accredited Laboratories” and is also posted on the HKAS website [www.info.gov.hk/itc/hkas](http://www.info.gov.hk/itc/hkas). A laboratory can only issue HOKLAS endorsed report with the HKAS accreditation mark on it for tests accredited by HOKLAS. A HOKLAS endorsed report shall be signed by a HOKLAS approved signatory of the issuing laboratory.

For medical testing, a laboratory may be accredited for testing-only services and/or tests that require clinical interpretation by pathologists under all circumstances regardless of the test results. Where clinical interpretation is required for a particular test, this will be stated in the scope. A laboratory, however, will only be accredited for a test requiring clinical interpretation if a qualified pathologist is available to provide such service. Tests requiring clinical interpretation are defined in the supplementary criteria of different disciplines.

For medical laboratories under the supervision of full-time pathologists, the pathologist’s name and his specialty will be specified in the laboratory’s scope. Similarly, names and specialties of consulting pathologists are also shown in the scope. Samples of Scope of Accreditation for laboratories under the supervision of full-time pathologists and those not under such supervision are provided in [Annex 1](#) and [Annex 2](#) respectively.

When accreditation is granted to a laboratory, the head of HKAS Executive will send a notification letter to the laboratory to inform it of the terms of accreditation, which will include the Scope of Accreditation and the names of approved signatories. HKAS Executive will further issue a certificate of accreditation to the laboratory. The certificate of accreditation shall include name of the scheme under which the accreditation is granted (i.e. the Hong Kong Laboratory Accreditation Scheme), the Test Category (i.e. Medical Testing), the International Standard to which the accreditation criteria is based (i.e. ISO 15189), the registration number, name and address of the laboratory and the date on which it is issued. If a laboratory is under the supervision of full time pathologist, this will also be indicated on the certificate. Samples of the accreditation certificate for laboratories with and without full time pathologist are shown in [Annex 3](#) and [Annex 4](#) respectively.
